LINE STORY

Explore the bronze boundaries of your true self with Versus. In this world, you're free to be who you really are or who you've always wanted to be. Soft and sweet or bold and edgy – or maybe even both. The Versus collection offers unique experiences for the different sides in all of us, but always the same color boosting core. Choose your story. With this double dip intensifier, discover your lighter side that is naturally charming, affectionate and warm.

COLOR TECHNOLOGY

Double Dip Formula: Silicone free formula contains a powerful peptide that helps stimulate melanin production to promote UV color results while also allowing for maximum sunless color development.

Vitatan®: Contains an exclusive combination of vitamins, minerals and antioxidants to accelerate color development. This blend moisturizes and energizes the skin so that it can rapidly build a base tan.

SKINCARE TECHNOLOGY

pH Balancing Blend: When skin's pH is unbalanced it cannot easily support normal skin functions. This blend optimizes and enhances skin's pH level, priming it for optimal, long-lasting color results while also helping protect skin.

Nourished Skin Blend: Is a luxurious blend of ingredients including Shea Butter, Glycerin, and Lavender that help moisturize, nourish and soothe skin to prolong color results.

Goji Berry Extract: Helps protect against free radicals and has a soothing effect on skin. Contains Vitamin A, which helps to condition and improve skin's appearance.

Cherry Extract: Antioxidant-rich fruit that helps to defend and protect skin from free radical damage. Cherry is high in Vitamin C which is known to help boost collagen production.

AVAILABLE SIZES

8oz Bottle | .5oz Packette

ADDITIONAL INFORMATION

While Lavender is known for its calming and relaxing abilities, it is also known to help naturally inhibit after tan odors.
