PRODUCT STORY— Aloe Collection

Take your color to the next level with **Hot!® Black**. This decadent formula utilizes our unique Aloe-Base that deeply conditions and moisturizes for touchable, soft skin and prolonged color. Extraordinary Black Bronzer is a powerful combination of Natural Bronzers, DHA and DermaDark® that provides both immediate and delayed dark results, while Sincere Skincare Blend provides necessary nutrients to ensure a strong tanning canvas. Upgraded **Biosine Complex®** softens and soothes for silky, smooth radiant skin, while **FadeDefy™ Technology** ensures those hard-earned results last days longer.

COLOR TECHNOLOGY

Extraordinary Black Bronzer: A unique blend of a moisturizing ingredient with Caramel, Black Walnut, Melanin and a high level of DHA provides immediate color development for instant gratification, delayed darker results that develop over time and hydrates for a uniform glow that lasts days longer.

DermaDark® Bronzer: Powerful natural color enhancer that helps build color gradually without the need of UV exposure.

SKINCARE TECHNOLOGY

Aloe-Base: Industry exclusive **ActiveAloe®** provides a high level of concentrated Aloe Vera that helps heal, soothe, and alleviate dry skin conditions.

Sincere Skincare Blend: A straight-forward mixture of natural ingredients, including Arugula, Velvet Bean, Mangosteen and Quercetin, that help to stimulate melanogenesis, enhance the activity and synthesis of tyrosinase, provide a great source of L-Dopa, a precursor in the tanning path to maximize melanin production while providing powerful antioxidants for a strong tanning canvas.

Upgraded Biosine Complex®: Advanced combination of ingredients help to soften and hydrate for maximum tanning results.

FadeDefy™ Technology: Native Australian Kakadu Plum, the richest source of Vitamin C, combines with decadent Shea Butter to moisturize, protect the skin for longer-lasting dark color.

Tea Tree Oil: A pure essential oil, known to have natural odor fighting properties, which help prevent after tan odor from developing.

AVAILABLE SIZES

8.5oz Tube | .5oz Packette

ADDITIONAL INFORMATION

The formula, packaging and fragrance make this a great unisex option for all tanning levels!
