

## PRO LAB KIT

The benefit of adding these to your current solutions is to enhance your client's experience. You get to be the mixologist and they get to experience the benefits of your artistry and enjoy their tan that much more.

### DHA BOOST – Enhance Skin

- Add 1 dropper full of DHA Boost to any Norvell spray tan solution to increase tan 1–2 levels.
- DIRECTIONS FOR USE: Give clients a deeper, darker tan with our DHA Boost! DHA combined with Erythrulose helps develop a longer-lasting tan and increases moisturization for optimal tanning results.

### HYDRATION LIFT – Hydrate Skin

- Add 1 dropper full of Hydration Lift to 2 oz. of any Norvell spray tan solution.
- DIRECTIONS FOR USE: Give clients intense hydration with Hydration Lift! Hydration Lift is formulated with breakthrough Triluronic acid technology that reaches 3 layers of skin for up to 24 hours of intense moisturization to keep skin looking smooth and supple. Helps to provide deep hydration immediately after application, replenish hyaluronic acid within skin, and relieves dry skin by repairing skin barrier function to retain moisture.

### VITAMIN BATH – Revitalize Skin

- Add 1 dropper full of Vitamin Bath to 2 oz. of any Norvell spray tan solution.
- DIRECTIONS FOR USE: Give clients ultimate skin health with our Vitamin Bath! Vitamin Bath is an amino acid & vitamin enriched spray treatment that revitalizes and hydrates the skin, making it look younger and feel supple. Helps to even and brighten skin tone and reduce inflammation. Helps to provide vital nutrients to combat environmental stressors and improve skin health.

### COLLAGEN BOOST – Boost Skin

- Add 1 dropper full of Collagen Boost to 2 oz. of any Norvell spray tan solution.
- DIRECTIONS FOR USE: Give clients improved skin appearance with Collagen Boost! Collagen Boost helps restore skin elasticity by smoothing the surface and prompting healthy cell renewal. Helps to stimulate collagen production and cell energy to reduce the appearance of wrinkles, skin imperfections and appearance.
