

DHA Booster Drops

DHA drops are designed to give an extra boost of DHA to the solutions. Customize any solution to achieve the perfect color for every client. Many salons and mobile technicians will have DHA drops on-hand to achieve any color-tone for their clients.

Selling point

- ✓ Add customization to the client's tan for an increased quality of sunless experience
- ✓ DHA drops can be used when a client wants to go a shade darker and thinks the next solution blend up may be too much for them

How to use

- To increase a solution's DHA level by 1%, add 3 full droppers to every 4 oz. of solution. You will want to adjust the amount added if using less than 4 oz. per client.
- When the session is finished, be sure to avoid pouring used solution back into its original packaging. The boosted solution can contaminate the original packaged solution making for an unpredictable development when used again.

Ingredient benefits

Aloe Vera - soothing properties, hydration, and antioxidant qualities

Ingredients: Water, DHA, Phenoxyethanol, FD&C Red#40, FD&C Blue #1, FD&C Yellow #5
