

Solution LUXE No.12

LUXE Violet No.12 is our dark blend featuring a Violet Base, another excellent year-round, and summer color. This solution is ideal for dark complexions throughout the year and will become very popular during summer months when client's with medium complexions have a bit more natural color to work as a base.

What is a violet based solution? Solution undertones are affected by the cosmetic bronzer within the formula. These cosmetic bronzers act as a color guide for technicians during application as well as a temporary color for the customer as the tan develops. The cosmetic bronzer will wash off in the shower' however, and it does have a staining power that tints the skin with the undertone used, violet, or green are most common. The tint is only temporary and will gradually fade.

How to use

Clean and prep the body using our pH Balancing prep spray and Barrier Cream. For a full-body tan, use 2oz. of the solution and only apply 1-coat. The client should wait 8-hours before rinsing and no longer than 23-hours. Do not use soaps or washes during the initial rinse. Soaps that can compromise the tan should be avoided for the duration of the tan.

*Technician tip: This alcohol-based solution will dry instantly, allowing your customers to immediately dress and prevent any "tacky" feeling they may experience from a hydrating solution.

Recommended skin type for this solution

General Characteristics Skin Type 4

- Mediterranean Caucasian complexion
- Brown or dark hair
- Olive skin
- Medium to heavy pigmentation
- Rarely burns, tans easily

General Characteristics Skin Type 5

- Middle Eastern complexion
- Dark brown or black hair
- Dark eyes
- Rarely sun sensitive
- May never burns, tans easily

Using Luxe 12 on the incorrect skin tone, such as a very pale complexion, could result in a drastic contrast between spray tan and natural skin tone, causing uneven fade or even an orange/unnatural looking sunless tan.

Ingredient benefits

Glycerin- A moisturizing ingredient that prevents dehydration of skin and aids in retaining moisture.

Cetearyl Alcohol – This alcohol is non-toxic and safe for the skin, also not drying or irritating like other types. This ingredient is 95% pure and natural. It is considered fatty alcohol derived from coconut oil. This is not a derivative of Petro. It is used as an emulsifier, which bound water and oil together and used as a texture enhancer.

Glyceryl Stearate- This is used as a skin-conditioning agent, emollient, and a surfactant.
