

Solution No. 6 Light Blend

The logic behind the winter glow is that this solution provides less contrast to the client's natural winter skin coloring which tends to be lighter.

How to use

- Use on naturally fair skin, who tend to have more of a pink undertone or during winter months for clients looking to achieve more of a 'winter' glow

Shower time: 6-8 hours after application

Tan longevity: 7-12 days with proper care

Recommended skin type for this solution

General Characteristics Skin Type 1

- Fair complexion
- Blonde or Red hair
- Light colored eyes
- Freckles are common
- Always burns, never tans

Using Solution 6 on a client with a darker complexion other than fair, or skin type 1, may develop too light or unnoticeable, potentially requiring a respray with a darker solution.

Ingredient benefits

Aloe Vera - soothing properties, antioxidant qualities and built in moisture lock

Walnut - derived from the husk of the nut and is beneficial in skin treatments, provides natural olive-coloring, and is used successfully in sunless spray solution to achieve natural-looking tans

Vitamin C - provides potent antioxidant protection, shielding skin from damaging free radicals
