

sunna

# Express Rinse Tanning Solution Medium | Dark

**Perfect for all skin tones! Just like our signature solution but now you can shower in 3-4 hours after application.**

## DESCRIPTION:

Sunna's express solution is carefully curated blend of skin-loving ingredients, combined with a lightweight formula, effortlessly glides onto your skin, ensuring a seamless application. As the solution works its magic, the powerful trio of ingredients delicately infuses your skin with a long-lasting, radiant tan. For clients who love the bronzer look and want to shower sooner than 6 hours. Keep in mind clients will need to be reminded that full tan development will be seen 24 hours post tan.

## HOW TO USE:

After using our Set Me Spray, coat the client with two light coats of solution and finish with Powder Me. With Express Tan, clients **MUST** shower 3-4 hours after their tan. Your client will notice they will have very little to no colour after showering. They will darken over the next 24 hours. After using Express, ensure the client is extra careful with palms, and feet. Washing their palms and applying lotion if needed is crucial as the tan will develop quickly in those areas. Clients should be careful to not get wet or touch themselves before showering. During their first shower, simply rinse and do not use body wash or shave.

## KEY INGREDIENTS:

Bilberry Extract  
JoJoba Oil  
Natural Cucumber Water
