Hydrate Me Gradual Tan Lotion

Hydrate + glow, all-in-one. Our best-selling hydrating lotion leveled up! Achieve a subtly sun-kissed, even all-over buildable glow. Use after a sunless tan or on its own.

DESCRIPTION:

Our Gradual Tan can be used as a tanning extender or apply on its own to achieve the tan of your dreams. Not only does this lotion hydrate and nourish your skin but it smells amazing. No fake tan smell here.

HOW TO USE:

Start with clean and dry skin. Allow the lotion to fully absorb into your skin before getting dressed. Using circular motions, apply the lotion evenly all over your body. Pay attention to areas that may need extra blending, such as elbows, knees, and ankles. For a more seamless application, consider using a tanning mitt. After application, remember to wash your palms thoroughly to avoid any unwanted staining on your hands. For the best results, it is recommended to exfoliate your skin once per week. Use daily until desired colour is reached. Leave the lotion on your skin for a minimum of 8 hours before showering off with water.

KEY INGREDIENTS:

Hyaluronic acid
Shea Butter
Scented with essential oils
