Keep Me Golden Sunless Tanning Mist

This "Tan in a Can" spray is our most versatile product. Most commonly used as a setting spray after make up application or prior to makeup as a long lasting contour for the face.

DESCRIPTION:

Keep Me Golden is perfect for extending the life of your existing airbrush tan, or alone as a do-it yourself tan. The self-tanning mist aerosol spray delivers an ultra fine mist for an easy to use application. The delicate hint of shimmer gives an immediate glow and allows for perfectly even application. It is also most often used as a makeup setting spray/contour bronzer spray for the face because of the organic caramel bronzer in this formulation.

HOW TO USE:

When applying to the body, we recommend having a blending brush or a sunless tanning mitt handy to blend any uneven areas. If using on the face apply with a make up brush. First, shake the can. When applying, less is more. Aim nozzle 12 inches away from your body to ensure even application. Begin by using long continuous strokes on each body part, blending out any uneven areas with a brush or mitt. We recommend allowing Keep Me Golden to develop on your skin for a minimum of 12 hours. Once you shower, you will find the bronzer washes off. Maintain your glow & moisturize with our tan-friendly Hydrate Me Body Lotion 2 X daily.

RINSE TIME:

KEY INGREDIENTS:

Jojoba esters
Vanilla Water
Coconut Fruit Extract

INGREDIENTS:

Aqua**, Dihydroxyacetone***, Aloe Barbadensis Leaf Juice*, Caramel**, Lactobacillus Ferment***, Ethoxydiglycol, Glycerin**, Hydrolyzed Jojoba Esters***, Vanilla Planifolia (Vanilla) Fruit Water**, Cocos Nucifera (Coconut) Fruit Extract**, Camellia Sinensis (Green Tea) Leaf Extract**, Propanediol***, Lactobacillus**.
